# Solutions For Corrosion Control

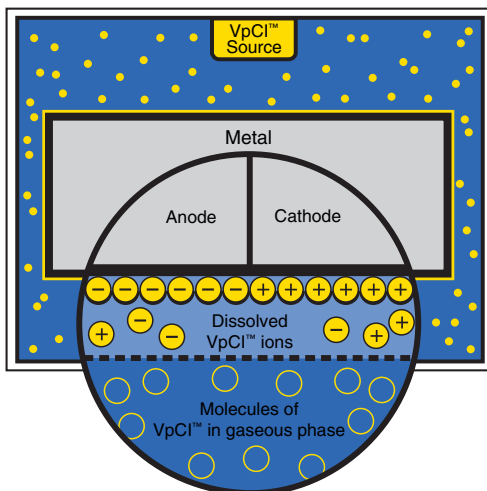

Corrosion costs industry billions of dollars in equipment failures, product rejects, price reductions/credits and short life spans. With Cortec® VpCI™ technology, you can control corrosion on all metal parts and products.

## Sources of Corrosion

- Oxygen
- Air
- Humidity/Temperature
- Salt
- Precipitation
- Chemicals
- Handling and Materials

## How Cortec® VpCI™ Works

- Forms a molecular layer of protection on metal surface
- Insulates metal surfaces from corrosion-causing contaminants
- Creates protective environment in enclosed areas

How  
Cortec®  
VpCI™  
Works

## Where Cortec® can Help

- Fewer product rejects
- Compliance with ISO or other standards
- Multimetal protection
- Reduced labor and disposal costs
- JIT applications

## Markets that Benefit From VpCI™ Technology

- Steel
- Automotive
- Industrial
- Construction
- Electronic
- Energy
- Aeronautic
- Consumer
- Military
