

# MIGRATORY CORROSION INHIBITOR (MCI®) PRODUCTS FOR CONCRETE

Whaling Wall #85

Whaling Wall #86

Whaling Wall #88

## CASE HISTORY

### World Renown Wyland Murals Protected with Cortec's MCI® Architectural Coating!

#### DATE

November 2000

#### CUSTOMER

Wyland Foundation

#### LOCATION

Florida/Hawaii

#### PRODUCTS

MCI® Architectural Coating

#### APPLICATION

The Wyland Foundation has been painting larger than life murals as a method to increase the public's awareness of environmental conservation. In total, 93 walls have been completed to date with plans to complete 100 walls by the year 2008. In some areas, these walls are exposed to high levels of UV exposure and harsh environmental elements. As a result, The Wyland Foundation was looking for a clear coat that could be applied over the murals and provide additional protection.

Cortec® Corporation became a sponsor of the Wyland Foundation in 2000, and has been working with them since that time to help protect the murals they create. For a number of the walls including WW85, WW86 and WW88, MCI® Architectural Coating was chosen as the product used to protect the murals. In total, more than 200,000 square feet (20,000 square meters) have been clear coated using MCI® Clear Coating.

#### CONCLUSION

The murals that have been coated with MCI® Clear Coat have stood up well to the environmental conditions to which they are exposed. We will continue to work with the Wyland Foundation where protection of their murals is required.

15 November 2000

Aloha Boris,

I would like to extend my thanks to you for supporting the Wyland Foundation during the creation of Wall #86, "Manatee Sanctuary", at the Homosassa Springs State Wildlife Park in Homosassa, Florida. Having now painted 86 of my intended 100 monumental lifesize marine-life murals, I am extremely pleased with the performance of Cortec's VCI-386 clearcoat product.

I am most proud of the fact that these life size murals will inspire thousands of people to respect, protect and preserve our oceans, lakes, rivers, streams, ponds, wetlands and all the marine life that dwells within. It is sure to be a Florida landmark for years to come.

On behalf of the Wyland Foundation, we thank you and invite you to join us in the future as we continue our mission of bridging the worlds of art and science. Together we can inspire generations around the globe to explore and care about our oceans and its magnificent sea life. One person can make a difference!

Mahalo,
