

CASE HISTORY

Longboat Key Florida Roof Protection

DATE

January 2012

CUSTOMER

Private Resident

LOCATION

Longboat Key, Florida

PRODUCTS

MCI®-2022

PROBLEM

The marble roof deck had been exposed to Florida sun and aging since 2004 when the home was constructed. It needed to be sealed to protect it from water ingress and to extend its life.

APPLICATION

MCI®-2022, a silane/siloxane based water repellent containing migrating corrosion inhibitors was applied to the marble at the recommended coverage rate of 150 square feet/gallon (3.68 m²/liter)

CONCLUSION

Cortec's MCI®-2022 is providing the much needed water repellency to the roof, allowing it to remain in service for years to come.
