

Compostable Films, Bags and Resin

Cortec Corporation, St. Paul, Minnesota, USA, in conjunction with EcoCortec from Beli Manastir, Croatia, has recently launched EcoWorks®, a line of biodegradable, compostable films, bags, and resin for blown film and cast film extrusion and injection molding. Cortec is strongly committed to producing compostable products and using sustainable resources to protect the environment and reduce the carbon footprint. EcoWorks products provide an environmentally conscious alternative to polyolefin materials. All products are certified 100% compostable according to ASTM D6400 and EN 13432 by the Biodegradable Products Institute (BPI) and DIN CERTCO. The EcoWorks line of products is available in various formulations, ranging from 5-70% renewable content, customized to meet the needs of the customer's application. EcoWorks products are designed for use in a wide variety of applications including retail packaging, industrial films, agricultural films, organic collection bags, and much more. Custom sizes and constructions are also available.
