PRODUCT SPOTLIGHT:

Protect your assets with EcoLine® 3220

EcoLine® 3220 is an innovative addition to Cortec® Corporation's environmentally safe, biodegradable line of products made from renewable resources. This ready-to-use, canola oil-based product with Vapor phase Corrosion Inhibitors (VpCIs) produces a tenacious film that adheres to metal surfaces.

CASE HISTORY:

VpCI®-309 Provides Long Term Protection for Pipeline Storage.

The customer needed to prevent the progression of corrosion to the interior of 60 pipes during several years of storage, as a back up for LNG gas pipeline in a harsh outdoor environment. The pipes would be exposed to high humidity, salt air, and high winds.
