PRODUCT DESCRIPTION

Cortec's Closed Loop Toad is a unique combination of Vapor phase Corrosion Inhibiting (VpCI®) powders in polyvinyl-alcohol (PVA) water-soluble bags. It was developed to provide corrosion protection in recirculating and operating cooling systems. This product prevents corrosion of metals in the liquid phase, vapor phase, and the liquid-vapor interface. The bag dissolves and the VpCI adsorbs on to all metal surfaces - reaching even recessed areas and interior cavities. The VpCI forms a strong protective molecular layer on the metal. Closed Loop Toad also contains a blend of organic-based scale inhibitors to prevent scale.
