

HIGH PERFORMANCE VCI COATINGS

S-25 Thinner

DESCRIPTION

S-25 is a solvent blend used in a number of permanent and temporary Cortec coatings to reduce application viscosity.

DOSAGE

Normally 5 – 10% by volume addition to the concentrate is sufficient to substantially reduce viscosity. The shelf life is 2 years. Please consult a Cortec representative for a specific recommendation.

PHYSICAL PROPERTIES

Appearance	Clear colorless liquid
Flash Point	145°F (63°C)
Weight per gallon	7.4 – 7.6 lb./gal. (0.89 – 0.91 kg/l)
