

EcoShield® Stands Up To Wet Bottoms

EcoShield® treated paper protects against moisture, grease, and oil. Its excellent moisture resistance beads-up wetness to prevent bleeding through packaging, discoloring labels, or staining surfaces. Even in aggressive applications of warm grease and oil, it keeps package tops, sides, and bottom from softening or deteriorating. EcoShield® gives you the barrier features of waxed or polycoated paper with the advantage of being recyclable and repulpable. Made in rolls of up to 96" wide for high volume conversion, EcoShield® can be used for corrugated, chip board, boxes, and liners.
