

Stop Scale, Corrosion Protect the Planet

VpCI™ Building Blocks for Water Treatment Formulations

Cortec® Patented VpCI™ Technology gives you the green building blocks to stop scale and corrosion during system operation. VpCIs can be added as a liquid or powder to your current treatment program. They are ideal for both closed and open loop systems, providing a complete inhibitor package for multi-metal protection and scale inhibition. Cortec® VpCIs replace nitrites, amines, azoles, molybdates and other corrosion and scale inhibitors. Cortec's advanced green technology offers a new bio-based antiscalant/corrosion inhibitor that is non-toxic, biodegradable, and developed from renewable resources. For details:
