

Stop Scale, Corrosion & Protect the Planet

VpCI™ Building Blocks for Water Treatment Formulations

Cortec® Vapor Phase Corrosion Inhibitors (VpCI™) give you the green building blocks to stop scale and corrosion during system operation. VpCIs can be added as a liquid or powder to your current treatment program. They're ideal for both closed and open loop systems, providing a complete inhibitor package for multi-metal protection and scale inhibition. Cortec® VpCIs replace nitrites, amines, phosphates, azoles, molybdates and other corrosion and scale inhibitors. For protection against bacteria ask about Cortec's new green bio-dispersant.
