PRESS RELEASE

Cortec® Corporation Celebrates 20 Years Of ISO 9001 Certification!

Cortec® Corporation, one of the first companies to be certified in Minnesota, marks 20 years of continuous compliance to ISO 9001 this year. Cortec® has been ISO 9001 certified since 1994, which demonstrates its dedication to total quality

and excellence once again. Stronger than ever, Cortec's effective management initiatives provides assurance that our impact is being monitored to control the effects on quality and customer service. It is our goal to constantly improve our performance.

Cortec's Quality Policy

At Cortec[®] Corporation, we are committed to meeting, and when possible, exceeding our customers' requirements, worldwide.

To do so, we will:

- Consistently achieve excellent service and timely delivery
- Continue to develop high quality, innovative products at the most competitive cost
- Continually improve our processes, to reach the highest level of quality and customer satisfaction in products delivered, services rendered, and all other aspects of our business
- Employ practices which will drive continual improvement in quality throughout all facets of Cortec[®]
- Provide a safe and productive work environment and environmentally sound practices

Founders of ISO, London 1946
(Photo Courtesy of www.iso.org)

The ISO story: In London, 1946 - 65 delegates from 25 countries met to discuss the future of International Standardization. In 1947, ISO officially came into existence with 67 technical committees (groups of experts focusing on a specific subject), and since then have published more than 19,500 International Standards covering almost all aspects of technology and business.

Today ISO (International Organization for Standardization) is the world's largest developer of voluntary International Standards; they have members from 162 countries, and about 150 employees. International Standards give state of the art specifications for products, services, and good practice; helping make industries more efficient and effective. Developed through global consensus, they help break down barriers to international trade.
