## Cortec® Spray Technologies Upgrades Its Bottle Filling Line

June 13, 2006

In order to better service our customer needs, Cortec® Spray Technologies in Spooner, Wisconsin has expanded its bottle filling line to accommodate a wide range of automated filling services for its increasing customer base. The recent upgrades allow Cortec® to fill bottle sizes from 6 oz (0.2 liters) to 1 gallon (3.87 liters) using a precise volumetric system. The upgraded line allows quick switch between different size bottles, speeding-up the production process and delivery time for our clients.

Cortec® Spray Technology focuses on both liquid and aerosol filling of oil, solvent, or water-based products. We have the flexibility to fill samples, small or medium runs, as well as large volume production at a competitive pricing.

Cortec® Spray Technology, a division of Cortec® Corporation, specializes in contract filling and private label development services. We can provide assistance throughout the whole production process from the development of private label to assistance with packaging design, warehouse, and worldwide distribution.
