Well Attended Cortec®-Carte Dozio Seminar In Milan, Italy

November 7, 2006

During the 25th Biannual Metal Working Machinery Tradeshow "Bi-MU" (October 9, 2006, Milan, Italy) Carte Dozio, Cortec's Italian distributor, organized a seminar on the topic "Metal Corrosion Protection During Warehousing and Shipment".

The seminar was focused on the basic concepts of the corrosion process and total corrosion protection solutions; risk management of oversea shipments; and Vapor phase Corrosion Inhibiting (VpCI™) Technology. The seminar was enriched by a valuable interactive dialogue discussing and exploring applications of Cortec's VpCI™ products.

The seminar was very successful and well attended by engineers, equipment designers, industrial packers/exporters, and representatives from global companies like Wartsila, Snamprogetti, Ocme, Smit Textile, and Beta Tools.

Cortec® Corporation is pleased to congratulate Carte Dozio for taking the initiative to organize this valuable seminar and essential to spread the knowledge of Cortec's Vapor phase Corrosion Inhibiting Technology (VpCI™) and its multiple corrosion prevention solutions.

Cortec® Corporation is a pioneer of environmentally friendly, corrosion protection Vapor phase Corrosion Inhibitors (VpCI™) & Migratory Corrosion Inhibitors (MCI®) technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
