## Cortec® Corporation Featured Twice in August New Equipment Digest Magazine!

New Equipment Digest (NED), described as “the industry’s most preferred products magazine for 75 years,” has featured Cortec® Corporation twice this month!

NED’s August “Top of the News” section includes a double entry on Cortec’s recent coatings breakthrough: EcoShield® 386 Water Based Coating powered by Nano VpCI®. This water based corrosion inhibitor protects metal structures in extremely harsh outdoor conditions with just a very thin high gloss clear coat that allows substrate inspection. The coating’s nano sized non-toxic organic corrosion inhibitors offer superior protection to traditional corrosion inhibiting coatings.

In addition, NED’s catalog section features Cortec’s MCI® (Migrating Corrosion Inhibitor™) HPRS® (High Performance Repair System) brochure for restoration of deteriorating concrete. This brochure is good for anyone desiring to make concrete repairs with the added durability of Cortec’s MCIs.

These two listings offer just a glimpse into the hundreds of innovative corrosion protection solutions Cortec® offers daily to industries across the spectrum!

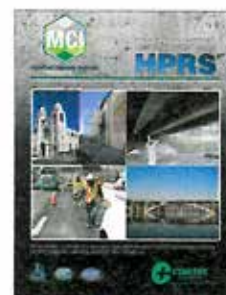

### Water Based Corrosion Inhibitor

EcoShield 386 Water Based Coating powered by Nano VpCI protect metal structures in extremely harsh outdoor conditions with just a very thin high gloss clear coat that allows visual inspection of the substrate. The acrylic based formula uses a complex mixture of nano sized non-toxic organic inhibitors which provide protection superior to traditional corrosion inhibiting coatings.
