## Cor-Pak® VpCI® Static Dissipative Bubbles Film Available at Cortec® Warehouse!

Cortec® team is excited to inform you that multi-functional Cor-Pak® VpCI® Static Dissipative Bubble Film rolls are now available at Cortec's warehouse. This film's unmatched quality is the only bubble film globally that is produced with latest Nano VpCI® technology providing a unique combination of cushioning and multi-metal corrosion protection. Cor-Pak® film is available in stock in standard size rolls 1000mm x 100m while custom sizes are available upon request.

This modern, clean and flexible packaging material combines volatile corrosion inhibitors with cushioning packaging bubbles to provide protection for most sensitive or delicate components. Cor-Pak® VpCI® Static Dissipative Bubble Film is suitable for various packaging applications - from surface protection and interleaving up to creation of protective cushions and empty space packing.

Using Nano VpCI® technology, the bubbles protect a variety of metals including carbon steel, aluminum, copper, brass, silver, and stainless steel without leaving residue on packaged items.

Corrosion of complex equipment is an increasingly serious problem for many manufacturers, causing expensive failures. Environmentally safe Cor-Pak® VpCI® Static Dissipative Bubble Film offers a simple and safe to use recyclable bubble wrap packaging solution that will cut costs.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001, and ISO 17025 Certified.

## Advantages of Cor-Pak® VpCI® Static Dissipative Bubbles Film:

- Simple, safe to use
- Provides a unique combination of cushioning and corrosion protection
- Provides multi-metal protection through Patented VpCI® Technology - VpCI® vapor does not interfere with subsequent processing (i.e. painting, welding, cleaning, soldering, etc.)
- Has no adverse effects on plastic (lexane), optics elastomers, and other non-metallics.
- Protects against triboelectric charge generation making them excellent packaging solution for electronic components.

Cor-Pak® VpCI® Static Dissipative Bubble Film conforms to NACE Standard TM0208-2008 “Laboratory Test to Evaluate the Vapor-Inhibiting Ability of Volatile Corrosion Inhibitor Materials for Temporary Protection of Ferrous Metal Surfaces”, conforms to MilSpecs: MIL-PRF-81705D for ESD and MIL-PRF-22019D for VIA, and is REACH and RoHS compliant.
