PRODUCT NEWS RELEASE

CorrTainer™ Brand of Coated Corrugated Boxes

Cortec® has spent 30 years testing products to ensure reliable results within the packaging industry. The findings show that Cortec® products come out on top when it comes to corrosion protection, cost effectiveness, and environmental friendliness. CorrTainer™ is no exception: it is a fully recyclable, repulpable and moisture and grease resistant container all in one box. CorrTainer™ eliminates the need for secondary packaging and offers a cost effective, environmentally friendly corrosion protection system. It is easy to use: with no surface preparation, desiccants, or poly-coated wraps needed, CorrTainer™ provides protection for ferrous and non-ferrous metals. It contains a Vapor phase Corrosion Inhibitor (VpCI™) which vaporizes to saturate the metal surfaces providing complete protection. The CorrTainer™ coated boxes are FDA approved for indirect contact with food.

Cadillac GM car body components shipped from Detroit to Shanghai in corrugated Cortec® CorrTainer™.
