EXTRA! EXTRA! EXTRA! EXTRA! EXTRA! EXTRA!

CORTEC COATED PRODUCT'S INNOVATIONS ABOUND!

With Cortec's latest facility addition, Cortec Coated Products Division, we are able to offer the packaging and printing industries a wider variety of great products and services. The Coated Products Division (CCPD) continues Cortec's long established reputation for high quality innovative products. CCPD works with unique and reputable companies to provide you and your customers with excellent packaging products at very competitive prices.

We have enclosed our Corporate and General brochures along with the Cortec Coated Products Division brochure. The CCPD brochure describes our operations, equipment, capabilities, and features some of the products we manufacture at our facility. You will also find a Product Data Sheet and a sample of each product that is currently available. Please keep in mind that we can meet your customer's specific custom needs.

Our new products provide unique packaging solutions using our field-proven VpCI technology. We are pleased to introduce our cushioning VpCI-146 Creped paper series, the water, oil and grease resistant VpCI Polycoated paper, and the extra-tough VpCI Reinforced paper.

Other additions to our performance-oriented product lines include our Linerboard series with anti-corrosion and/or barrier properties. Also included in this package is specialty VpCI papers including barrier coated VpCI-144, anti-static VpCI-145 and Cor-Pak SilverBrite made especially for copper and silver products. And let's not forget our new VpCI coated film series (protective VpCI Masking and cohesive VpCI Cold Seal films) and VpCI Fabric.

Visit us at www.cortecoatedproducts.com for more information or contact us directly and a friendly customer service representative will be happy to assist you.
