NEWS RELEASE

Cortec® EcoWorks® 45 biodegradable film for pet waste bags.

Part of being a responsible pet owner is picking up after your pet. In many cities and communities, it's also the law. For years pet owners have placed biodegradable dog waste into plastic bags that can take over 100 years to decompose. Cortec® offers a planet friendly solution: Doggy Poos™ bags.

Doggy Poos™ bags are EcoWorks® 45 bags specifically sized and packaged for convenient and easy pet waste pick up and disposal. Proud pet owners that are concerned for the environment are now able to be responsible in their community by cleaning up after their pets while not damaging the environment. These bags meet the most stringent biodegradability standards worldwide, including EN 13432, ASTM D 6400, and are listed with Din Certo and BPI.

Simply purchase Doggy Poos™ bags for your pet, then dispose of the waste in an environment rich with microorganism activity, and the bags will completely biodegrade into carbon dioxide and water within weeks. They are especially suitable for easy pickup and disposal in a garden or municipal collection bin. Doggy Poos™ bags are based on annually renewable content (45%), reducing the use of petrochemical plastics. They are completely shelf stable and waterproof – preventing messy leaks or tears.
