PRODUCT RELEASE

Bionetix® ENZA 4EP: Superior Multi-Purpose Cleaning, Waste Treatment, and Remediation with Enzymes!

Bionetix® has harnessed the power of four enzymes to improve the speed and efficiency of cleaning and remediation! ENZA 4 EP offers a fully balanced blend of enzymes that serve as biological catalysts to single out and break down specific contaminants like starch, oil, grease, and more. This powder blend can save time and money when added to

cleaning formulations at restaurants, cafeterias, industrial locations, and garages. In addition, these enzymes offer a green, sustainable alternative for remediating contaminated soil and groundwater.

Enzymes show many advantages over chemicals due to their selectivity, specificity, and compatibility with the environment. In ENZA 4 EP, the four biological catalysts are amylase, protease, lipase, and cellulase. Each of these enzymes has been chosen to target and degrade a specific contaminant. For example, lipase breaks down fats and greases, while protease attacks proteins such as bloodstains. All four enzymes work together for superior multi-purpose cleaning in settings subject to a variety of tough contaminants.

ENZA 4 EP can be used in formulations for carpet cleaners, drain maintenance, odor control, washrooms, grease traps, septic systems, industrial waste treatment, and soil and groundwater remediation. In all these cases, ENZA 4 EP offers speedier, more efficient cleaning or remediation through the natural power of enzymes.

ENZA 4 EP comes as a brownish powder formulated to be used 0.5%-1% in all-final products (rates can vary with different types of applications). It has a pH of 5.0-7.0 with a bulk density of 1.00-1.06 g/mL. ENZA 4 EP is packaged in several standard sizes with custom packaging available.

POWDER ENZYME BLEND CONCENTRATE CONTAINING AMYLASE, PROTEASE, LIPASE AND CELLULOSE FOR A SUPERIOR MULTIPURPOSE CLEANING, WASTE TREATMENT AND REMEDIATION											
<p>ENZA 4 EP POWDER ENZYME BLEND CONCENTRATE FOR MULTIPURPOSE CLEANING AND REMEDIATION</p>											
<p>ENZA 4 EP CAN BE USED IN FORMULATIONS FOR:</p> <ul style="list-style-type: none"> Carpet cleaners Drain maintenance Odor control Grease traps Septic systems Industrial waste treatment 	<p>SPECIFICATIONS</p> <table border="1"> <tr> <td>Description</td> <td>Brownish Powder</td> </tr> <tr> <td>Packaging</td> <td>50kg, 25kg, 10kg, 5kg, 1kg, 400g, 250g, custom packaging available</td> </tr> <tr> <td>Bulk Density</td> <td>1.00 - 1.06 g/mL</td> </tr> <tr> <td>pH</td> <td>5.0 - 7.0</td> </tr> <tr> <td>Enzymes Present</td> <td>Amylase, Protease, Lipase, Cellulase</td> </tr> </table>	Description	Brownish Powder	Packaging	50kg, 25kg, 10kg, 5kg, 1kg, 400g, 250g, custom packaging available	Bulk Density	1.00 - 1.06 g/mL	pH	5.0 - 7.0	Enzymes Present	Amylase, Protease, Lipase, Cellulase
Description	Brownish Powder										
Packaging	50kg, 25kg, 10kg, 5kg, 1kg, 400g, 250g, custom packaging available										
Bulk Density	1.00 - 1.06 g/mL										
pH	5.0 - 7.0										
Enzymes Present	Amylase, Protease, Lipase, Cellulase										
<p>PRODUCT DESCRIPTION</p> <p>ENZA 4 EP is a special four-enzyme blend made up of amylase, lipase, protease, and cellulase. This product is best effective when formulated into products to efficiently remove starch, oil, grease, and more. Products with this formulation can be used in restaurants, cafeterias, industrial locations, garages, and contaminated sites. Enzymes are proteins which function as biological catalysts. Each enzyme has its own specific function: lipase breaks down fats and greases, protease breaks down proteins (blood), amylase breaks down starch, and cellulase breaks down cellulose, etc.</p>	<p>STORAGE AND HANDLING</p> <p>Store in a cool dry location. Do not ingest or breathe. Avoid contact with eyes. See SDS. Bionetix® will not be held responsible for quality issues after 6 months of storage.</p>										
<p>ENZA 4 EP provides a fully balanced enzyme blend which will noticeably improve the speed and degradation efficiency for different situations. Enzymes show many advantages over chemicals due to their selectivity, specificity, and compatibility with the environment.</p> <p>ENZA 4 EP uses enzymes as a green, sustainable alternative for remediation of contaminated soil and groundwater. This enzyme blend selectively targets contaminants, saving time and money.</p>	<p>APPLICATION</p> <p>ENZA 4 EP is formulated to be used 0.5% to 1% in all final products. Each product design rate can vary with different types of application. Please contact your local Bionetix® representative for further information.</p>

Bionetix® International produces biological waste treatment products that are used in thousands of field applications worldwide. The Biological Series of products—among the earliest products introduced by Bionetix Canada – can be found in countless food preparation and processing locations in the United States, Europe, South America, and Asia. Numerous municipalities around the world have accepted these products. Headquartered in Quebec, Canada; Bionetix International is a subsidiary of Cortec® Corporation. ISO 9001:2000 Certified.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001:2004, & ISO 17025 Certified.
