PRODUCT NEWS RELEASE

Eco Wrap® Biodegradable Film Crosses the Ocean!

For the first time in history, biodegradable stretch film has been used commercially in an international shipment that crossed the ocean. The shipment from Croatia to Minnesota arrived in flawless condition; once again proving Cortec® Corporation's films are 3 times stronger and a more economical choice for the consumer.

The unique combination of highly elastic certified biodegradable polyester with cling coating allows Eco Wrap® to replace non-biodegradable tensioning films and palletizing wraps. The superior strength of Eco Wrap® allows down gauging, fewer wraps per shipment, and eliminates disposal/reclamation costs. Eco Wrap® is also suitable for masking applications and is available with patented multi-metal corrosion inhibiting properties. Ideally suited for agricultural shipments.
