SOLUTIONS FOR INDUSTRIAL EFFICIENCY

AISLE-MASTER FOR  
VERSATILE INDOOR AND  
OUTDOOR OPERATION

**INSIDE**

## HEALTH & SAFETY

Segregating pedestrians from vehicles is critical in the workplace but areas where this is not possible must be managed with extra care

14

## HANDLING & STORAGE

It is important that at all times genuine parts should be used to maintain explosion-protected forklifts to ensure safety

18

## PREMISES MANAGEMENT

Replacing light fittings with HILUX units has delivered substantial energy savings and improved worker's health for one manufacturer

## Save Time and Money

Cortec's EcoClean® Biodegradable Scale and Rust Remover powered by Nano VpCl®

Unclogging your heat exchangers, chillers, condensers, cooling towers, and pipes is safe, fast, and easy with EcoClean® Biodegradable Scale and Rust Remover powered by Nano VpCl®. EcoClean® Scale Remover is one of the fastest acting products on the market for dissolving heavy scale, corrosion, and naturally occurring oxides off metal surfaces in contact with water, providing one safe remover for all your descaling and de-rusting needs. EcoClean® Scale and Rust Remover is one of the fastest acting products on the market, providing a quick, environmentally friendly cleaning solution with minimum downtime. It is a safe, simple, and effective way to preserve the quality of your water system and ensure it runs at peak efficiency.

## Connect 2 Cleanrooms Announce Redeveloped Responsive Website

Connect 2 Cleanrooms has redeveloped its Cleanroomshop.com website, using the latest trends in e-commerce for its specialist range of cleaning products, equipment and furniture. Today's purchasing departments have high expectations of the technology they use for their purchasing and this drives a culture of constant improvement for websites, with a focus on user experience. Connect 2 Cleanrooms wanted to harness this trend for its clients and so have been working in partnership with a prolific web agency in Manchester, the North West's digital hub. Together they have redeveloped Cleanroomshop.com onto a world-leading website platform, making it responsive across desktop, tablet and mobile devices - as well as adding a raft of new features that will streamline its visitor's experience. The Lancaster-based company is known for being progressive with its use of technology and earlier this year won Online Business of the Year at the Red Rose Awards.

## Securikey - first stop for master lock® products

Securikey is the largest supplier of Master Lock® products to the UK security market. Offering a comprehensive range of highly innovative products including combination padlocks, key padlocks, locker locks, safety lockout and key storage solutions, all Master Lock® ranges from Securikey are designed to meet the exact needs and standards of the UK market.

Master Lock® is a name that is synonymous in the industry with quality and innovation. Whether required for use at home, school or in a commercial setting, every Master Lock® product offers reliability, durability and high functionality.

Master Lock® key storage solutions provide an option for access control into buildings, and are used by maintenance workers, district nurses, cleaners, home helpers and children after school. Securikey also provides a range of other Master Lock® products, including cables and chains, hasps and staples, special purpose locks, DDA (Equality Act) padlocks and a portable security safe.

## FibreGrid are leaders in GRP Fibreglass Grating technology

FibreGrid moulded grating offers a cost effective alternative to traditional steel with the advantages that it is fire retardant, corrosion and impact resistant, anti-slip, easy to fit and manoeuvre because it is so light, and easy to clean. Unlike steel, it won't buckle if heavy objects bump into it.

Gratings can be produced in virtually any colour (with an extended lead time), and in various sizes.

### Slip Resistant:

The open mesh flooring comes with a slip resistant top surface as standard and easily exceeds the minimum requirements of the 'extremely low' potential for slip rating demanded by the UK Slip Resistant Group Guide of 2002.

### Impact Resistant:

Bump into steel grating with a forklift, for example, and it will buckle. GRP grating has high energy absorption and can be repeatedly knocked without causing permanent damage.

### Lightweight:

At only 12.3kg per square metre (25mm high) and 19.5kg per square metre (38mm high), you don't need any heavy lifting gear or specialist equipment. A two-person team can easily complete the job.

### Fire Retardant:

The grating has been tested in accordance with BS 476: Part 7 and also meets the requirements of Class 2 (certificates available on request). If you need a higher resistance and low smoke generation, then a phenolic resin is available. Unlike steel, there is no danger of sparking if metal objects are dropped on the grating.

### Corrosion Resistant:

The grating can be used in the toughest conditions, such as oil rigs, chemical plants and coastal applications, with a choice of chemical resistant resins

## Engineers with distinction

Four apprentice engineers at AutoCoding Systems have all recently completed a two year day release course which has resulted in them attaining a BTEC Level 3 Diploma and NVQ Extended Diploma in Electrical and Electronic Engineering. Lewis Brailsford, Matthew Hughes, Ross Hughes and Paul Lawton achieved Distinctions and Merits across the twelve units studied which demonstrates their hard work and commitment. The qualifications are designed to equip individuals with the practical skills, knowledge and understanding required to work effectively within the electrical/electronic engineering industry. AutoCoding Systems made the decision to invest in an Apprenticeship scheme to ensure their engineers received a high level of practical and theoretical training, alongside professional "on-the-job" mentoring from experienced AutoCoding Project Engineers. With such great results, it's hoped that there will be the opportunity to progress towards HNC and HND level qualifications in the future.
