Successful meeting states the obvious - Cortec® is a force to be reckoned with!

October 25, 2007

In August 2007, Cortec® Sales Partners gathered from the Nordic region including Baltic countries to participate in a Sales Meeting held in Espoo, Finland.

Similar to previous years, sales in the Nordic region continue to show steady progress; with increased use of Cortec® products in an extensive variety of applications, ranging from automotive, telecommunications, offshore, mining, military, coatings, construction, and steel mill industries.

Attendees had the chance to discuss new Cortec® products and technological developments as well as share a multitude of experiences, opportunities, and challenges. A visit to a leading plastic manufacturer was enriching for all participants.

The Group enjoyed the Finnish hospitality by celebrating the meeting achievements with a superb dinner which highlighted traditional Finnish cuisine and was followed by enthusiastic dancing.

The next meeting is scheduled to take place in April of 2008 and will be held in Reykjavik, Iceland.

Cortec® Corporation is a pioneer of environmentally friendly, corrosion protection Vapor phase Corrosion Inhibitors (VpCI™) & Migratory Corrosion Inhibitors (MCI®) technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
