

NEWS ALERT

Bull Frog's Complete Marine Corrosion Control System Brochure Translated into German

Cortec® has translated its brochure on Bull Frog® marine corrosion control products into German! This gives German-speaking owners of yachts or other watercraft easier access to learning about the complete marine corrosion control system Cortec’s line of Bull Frog® products offers.

Bull Frog® provides a full system of innovative care products powered by VpCI® to protect valuable watercraft from corrosion. The system incorporates VpCI® directly into tool wipes, fuel additives, lubricants, high-shine wax, and other applications for added corrosion protection in the course of routine watercraft maintenance.

Bull Frog® protects with a special “Molecular Umbrella” that seals out air and moisture that cause rust and corrosion. This protective layer helps marine equipment perform at an optimal level while remaining safe for users and the environment.

Cortec’s new translation is especially timely as Cortec® expands the availability of the Bull Frog® line throughout Europe. The translated brochure will be a helpful tool for German-speaking customers who are looking for the best corrosion control system on the market to preserve their marine investments!

The German translation can be found at the following link:
