### PRESS RELEASE

## Cortec® Corporation Only Laboratory in VCI Industry ISO/IEC 17025 Accredited!

Cortec® Corporation is the only company in the VCI (Volatile Corrosion Inhibitor) industry to have a Laboratory that is ISO/IEC 17025 accredited. This standard (17025) covers all aspects of quality for testing laboratories, including: testing procedures, test equipment calibration, method/instrument validation, training of chemists and lab technicians, and interpretation/reporting of test results. Accreditation is obtained through an independent organization (accreditation body) that audits Cortec's Laboratory and certifies that we are in compliance with the standards. Cortec's Laboratory has been accredited since

September 2010, and offers a variety of tests included under the scope. To maintain this accreditation, the laboratory is re-evaluated each year to ensure its' continued compliance with requirements, and to check that its' standard of operation is being maintained. The laboratory is also required to participate in relevant proficiency testing programs between reassessments, as a further demonstration of technical competence. When our customers receive certified test reports from Cortec Laboratories, they can be assured that those reports are accurate and unbiased.

Obtaining and maintaining accreditation requires a significant investment of time and money. This investment is further evidence of Cortec's commitment to excellence and leadership in this industry.
