### PRODUCT NEWS RELEASE

## Cortec® Corporation's MCI® Mini Grenades Provide Repair System In Just The Right Amount!

Cortec® Corporation's Migrating Corrosion Inhibitors (MCI®) Mini Grenades consists of Cortec's proven MCI® 2006 NS which is pre-measured and packaged in water-soluble Poly Vinyl Alcohol (PVA) bags. This product has Cortec's name and logo printed all over them, guaranteeing authentic MCI® at the proper dosage rate. The PVA bag dissolves easily when in contact with water during mixing of concrete or mortar, allowing the inhibitors to disperse evenly.

The MCI® Mini Grenades have Cortec's name and logo printed all over them, guaranteeing authentic MCI® at the proper dosage rate, making them ideal for repair mortars and grouts.

When incorporated into repair mortars and grouts, MCI® Mini Grenades not only protect metal they are in contact with, but will migrate into adjacent areas providing effective corrosion protection and reducing the insipient anode effect. One MCI® Mini Grenade protects 0.4 – 0.6 cubic feet (0.015 cubic meters). This product is covered under United States Patent number 6,306,210 B1.
