PRESS RELEASE

**MIGRATING CORROSION INHIBITORS
FROM GREY TO GREEN**

MCI® Creteskin® - Best Equipment Protection For Reduced Cost!

Cortec® presents MCI® Creteskin®, an industrial strength release agent containing Cortec®'s revolutionary patented Migratory Corrosion Inhibitors (MCI®) technology. Cortec®'s globally recognized MCI® technology protects reinforcing metal in concrete from corrosion, rehabilitates existing concrete structures and extends the life span of new structures. MCI® Creteskin® is carefully designed to provide powerful protection to equipment, vehicles and forms in the construction industry

Cortec MCI® products for concrete maintain structural integrity, rehabilitate vulnerable structures and alleviate environmental concerns.

This clear protective coating inhibits the adhesion of concrete, other cementitious materials, salts and abrasives to painted and unpainted metal surfaces such as carbon steel and aluminum. It also provides corrosion protection to the underlying substrate, enabling continued use and a longer lifespan. A unique feature of MCI® is that the inhibitor will migrate a considerable distance through concrete to protect embedded ferrous metals

Once cured, MCI® Creteskin® provides an extremely durable and resistant surface that will stand up to high pressure and/or hot water washes typically used when cleaning concrete trucks and mixers. The coating allows easy cleaning with high-pressure water as an alternative to using abrasive blasting or harmful acids. Using MCI® Creteskin® will further reduce costs and water consumption by eliminating the constant need for cleaning your equipment.

MCI® Creteskin® enables reducing cleaning to once per week as well as reduced water consumption. It is chemically resistant to caustic soda and HCl and can also be used as a sacrificial anti-graffiti coating. No acid is needed in cleaning.

MCI® Creteskin® is especially designed to provide strong protection to equipment, vehicles and forms in the construction industry

Typical Applications

- **Ready Mix and salt/sand truck chassis'**
- **Drum mixers**
- **Batching Plants**
- **Construction equipment**
- **Concrete forms and molds**
- **Scissors lift**

MCI® Creteskin® conforms to ASTM B-117, ASTM D-1748 and is RoHS compliant.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001:2004, & ISO 17025 Certified.
