PRESS RELEASE

Cortec® MilCorr®: Stronger Than Mother Nature!

Hurricanes are the synonym of destruction. The protection of infrastructure and personal assets against these massive storms, have called for increased utilization of corrosion inhibitor packaging protection to neutralize the damaging effects of saltwater, humidity, and debris hurled through the air. In 2004, after 3 major hurricanes struck the coasts of Florida, Cortec's MilCorr® VpCI® Shrink Film demonstrated outstanding resistance to the power of the storms.

Cortec's MilCorr® VpCI® Shrink Film helps to greatly preserve surfaces against the most powerful elements of nature by providing non-toxic, environmentally friendly protection with corrosion inhibitors that can replace conventional rust preventatives such as oils and desiccants, offering an alternative to wooden crating, aluminum foils, and vacuum packaging.

MilCorr[®] VpCI[®] Shrink Film is a heavy duty film featuring Cortec[®] multi-metal Vapor phase Corrosion Inhibitors (VpCI[®]) which provides top-notch universal protection to maintain the integrity of the film itself as well as the parts packaged within. The VpCIs vaporize and condense on all metal surfaces within the enclosed space, and diffuse to every area of the part; protecting its exterior as well as void spaces and recessed areas. MilCorr[®] VpCI[®] Shrink Film offers complete product storage protection during domestic and overseas shipments, virtually eliminating any rust claims on:

- Steel
- Iron
- Brass
- Copper
- Solder
- Aluminum
- Silver
- Nickel

Cortec[®] MilCorr[®] VpCI[®] shrink films conform to military specification MIL-B-22019D, NACE Standards RP0487-2000, and TMO-2008.
