

NEWS ALERT

Cortec's EcoLine® 3680 Featured In April Issue of Pollution Engineering!

Biobased Open Atmosphere Corrosion Inhibitor

Cortec Corporation has developed EcoLine 3680, a certified biobased, biodegradable, ready-to-use temporary coating for multimetal protection. The product is formulated with USDA renewable raw

materials, providing corrosion protection of equipment where incidental contact with food is possible. It provides premium indoor and outdoor multimetal protection. When applied on a surface, it leaves a dry-to-touch protective coating. The film is self-healing and moisture-displacing, providing superior protection even against aggressive environments. This wax-like film can be removed with alkaline cleaners.
