

NEWS ALERT

Cortec's "VpCI® Technology for Automotive Industry" Brochure is Now Available in Portuguese!

Cortec® has recently translated its VpCI® Technology for Automotive Industry brochure into Portuguese! This makes VpCI® Technology solutions much more accessible to customers and distributors in places like Brasil, where the automotive industry plays an important role.

In addition to explaining the workings of VpCI®, this brochure highlights specific products that will prevent rust on automotive parts and equipment. Not only can Cortec® supply high performance coatings and protective products for shipping, storage, and de-rusting—Cortec® is able to evaluate the entire WIP (work in progress) cycle and implement the best corrosion inhibiting plan for machining, washing, and post production applications.

With this new step of brochure translation, Cortec® eagerly anticipates providing better service for its Portuguese-speaking customers in the automotive industry.
