**NEW PRODUCT RELEASE:**

**Polymer Additive  
M-381  
Corrosion Inhibiting Additive to Coatings**

# **M-381**

Cortec Corporation has developed a revolutionary paint coatings additive. **M-381** is a high-quality, corrosion inhibiting additive that is water-based. In addition to corrosion inhibition, **M-381** self-healing and high flash point properties, this **Additive** provides a powerful combination of contact and vapor phase corrosion protection using organic and inorganic compounds.

**M-381** provides excellent resistance to oxidation and has good high temperature stability. This water –based corrosion inhibitor is designed for waterborne coatings or compounds. **M-381** should be used with carboxylated acrylic or styrene-acrylic latices. No ammonia is present in this additive.

## ***Advantages of M-381 Coatings Additive:***

- Excellent Corrosion Resistance
- Compatible with most latices
- Can be post added to batch
- Low Viscosity
- Improves salt spray, humidity resistance and prohesion
- Minimal odor
- Prevents flash rusting
- Low VOC
- No ammonia present in formulation
- Effective on carbon steel, stainless steel, aluminum, and galvanized steel
- Available in 5 gallon (19 liters) buckets, and 55 gallon (208 liters) drums, liquid totes and bulk volumes.
