**PRESS RELEASE**

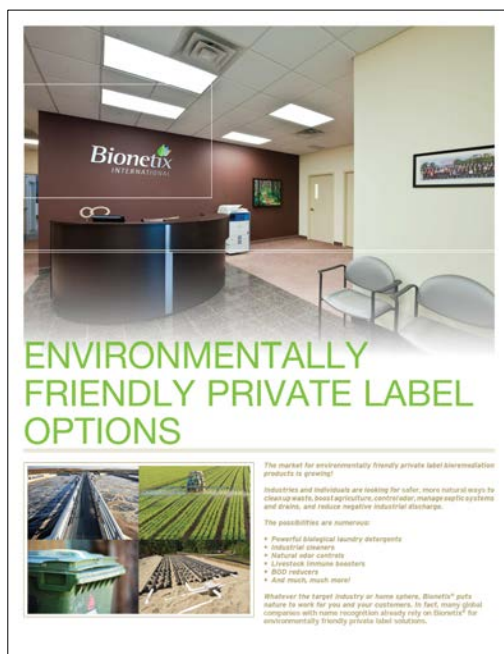

## **New Brochure from Bionetix® International Presents Environmentally Friendly Private Label Options!**

Global companies with name recognition already rely on Bionetix® International for environmentally friendly private label solutions. Now, those solutions are becoming more accessible through Bionetix's new *Private Label Solutions* brochure!

This new brochure describes the growing market for Bionetix's environmentally friendly bioremediation and cleaning products as industries and individuals look for safer, more natural ways to clean up waste, boost agriculture, control odor, manage septic systems and drains, and reduce negative industrial discharge.

Bionetix makes it simple for companies to supply these options to their customers without the hassle of overseeing biological production.

Bionetix® International has been supplying natural biological products to the petroleum, food and agriculture, and hazardous waste industries since 1996. Bionetix® relies on bacterial and enzyme supplementation to enhance the bioremediation of waste systems, the natural power of cleaners, and the health of livestock. These products are used globally in a variety of applications:

- Cleaning
- Septic Maintenance
- Drain and Grease Trap Maintenance
- Odor Control
- Agriculture Enhancement
- Waste Treatment

Bionetix® formulations contain specific, all-natural microorganisms to break down organic pollutants – without the use of chemicals and further damage to the environment. These components can be tailor-made to meet specific private labeling needs. The brochure explains the four-step customization process:

1. Choose your product type
2. Select a delivery system
3. Decide on optimal bacteria strains and counts
4. Pick any product color, fragrance, and viscosity desired!

**NATURAL CLEANING SOLUTIONS FROM BIONETIX® INTERNATIONAL**

Bionetix® International produces biological waste treatment and cleaning products that are used in thousands of field applications worldwide.

Since 1996, Bionetix® International has supplied natural biological products to the petroleum, food and agriculture, and hazardous waste industries to upgrade target substances in waste systems.

Bionetix® relies on bacterial supplementation through the application of biochemical cleaning products to effect the bioremediation and bioremediation of waste systems. Our products are used in countless applications globally.

**HARNESSING THE POWER OF NATURE**

Bionetix® biological digestants are composed of 100% naturally occurring, non-pathogenic microorganisms that have been specifically selected for their ability to degrade target substances.

Bionetix® formulations contain specific, all-natural microorganisms to break down organic pollutants – without the use of chemicals and further damage to the environment. Bionetix® bacteria are safe.

None of the organisms found in our products are genetically engineered or pathogenic for animals, plants, or humans.

**CUSTOM SOLUTIONS**

Bionetix® offers tailor-made solutions for your private labeling needs. Multiple mix and match options are available to make sure you get just the right product for your budget plan and for the needs of your target retail or industrial customers.

**The Process:**

Bionetix® can also supply specialized free enzymes for products if needed, along with the expert understanding of how to stabilize them.

Product Types	Bacteria Strains	Bacteria Counts
<ul style="list-style-type: none"> <li>• Cleaning</li> <li>• Septic Maintenance</li> <li>• Drain &amp; Grease Trap Maintenance</li> <li>• Odor Control</li> <li>• Agriculture Enhancement</li> <li>• Waste Treatment</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Bacillus subtilis</i></li> <li>• <i>Bacillus distalfermentis</i></li> <li>• <i>Bacillus pasteurianus</i></li> <li>• <i>Bacillus amyloliquefaciens</i></li> <li>• <i>Bacillus pasteurii</i></li> <li>• <i>Bacillus cereus</i></li> <li>• <i>Pseudomonas putilla</i></li> <li>• <i>Pseudomonas fluorescens</i></li> <li>• <i>Arthrobacter globiformis</i></li> <li>• <i>Tetradymus fessii</i></li> <li>• <i>Lactic acid bacteria</i> such as <i>Lactobacillus acidophilus</i></li> <li>• <i>Saccharomyces cerevisiae</i></li> <li>• <i>Enterococcus faecium</i></li> <li>• And others...</li> </ul>	<ul style="list-style-type: none"> <li>• For Liquids Up to 50 Billion CFU/g</li> <li>• For powders Up to 500 Billion CFU/g</li> <li>• For Tablets Up to 20 Billion CFU/g</li> <li>• For Blocks Up to 5 Billion CFU/g</li> <li>• For aerosols Up to 1 Billion CFU/g</li> </ul>
<b>Delivery Systems</b> <ul style="list-style-type: none"> <li>• Liquid</li> <li>• Powder</li> <li>• Tablets</li> <li>• Blocks</li> <li>• Aerosols</li> <li>• Slow releasing blocks</li> </ul>		

By following these steps, vendors can choose the optimal product for their budget plan and the needs of their target retail or industrial customers, making these excellent natural Bionetix® options available to a growing market!
