To: Whom It May Concern

Re: REACH Update

Cortec Corporation is pleased to announce that it has successfully completed the necessary pre-registrations of the substances used in its products.

The registration obligations of our substances will take place, based upon the quantities produced, between 2010 and 2018. Cortec Corporation can reliably make use of the appropriate transition periods, as it has followed all necessary steps for pre-registration. This will guarantee the uninterrupted supply of our products within Europe.

The Safety Data Sheets for our products are in full compliance with the regulation. In addition, we may need to contact you about the development of generic exposure scenarios.

We will continue to work with our only representative as we move toward full registration of our environmentally friendly corrosion protection products.
