To: Whom It May Concern

Re: Substances of Very High Concern (SVHC)

As of December 2011, the European CHEMical Agency (ECHA) has included 73 substances in the Candidate List of Substances of Very High Concern (SVHC) for authorization. The ECHA published the list on its website at http://echa.europa.eu/chem_data/candidate_list_table_en.asp

Please be advised that based on the information available to us from our raw material suppliers and based on generation during production, Cortec's product lines do not contain as intentional additives, any of the referenced materials at > 0.1%, per Articles 33, 57 and 59(1) unless listed below.

Cooling Loop Gator contains Disodium tetraborate
Closed Loop Toad contains Disodium tetraborate
VpCI-619 contains Disodium tetraborate and Boric Acid
VpCI-432 contains 1-Methyl-2-pyrrolidone
VpCI-433 contains 1-Methyl-2-pyrrolidone
EcoClean 433 contains 1-Methyl-2-pyrrolidone

Since we do not expect these materials to be present in the rest of our products, we do not specifically run any analysis on our raw materials or end product to measure for these materials.

Sincerely,

Rita Kharshan, PhD
Laboratory Director
