### PRODUCT NEWS RELEASE

## 100% FDA Approved Ingredients!

Cortec's S-8 is a unique non-toxic corrosion inhibitor for food cans. Choices of corrosion inhibitors for the food industry are severely limited by Food and Drug Administration (FDA) regulations. S-8 is formulated with 100% FDA approved ingredients. This inhibitor is very economical; it can be used at very low concentrations and still provides complete corrosion protection for cans submerged in water, exposed to vapors, or in interface areas.

S-8 outperforms other "green" inhibitors due to its stability in wide temperature ranges and its ability to form a thin protective layer that will not cause sticky deposits. It is compatible with the majority of water chemistries.

The choices of corrosion inhibitors for the food industry are severely limited by Food and Drug Administration (FDA) regulations. S-8 is formulated with 100% FDA approved ingredients.
