

# USCC Conference Attendees!

Cortec helps companies and communities by providing efficient and economical solutions as well as lowering the cost of doing business. Imagine if your equipment lasted twice as long or if your building did not have any rust on the structural steel! Imagine if your community could increase its participation rate by having a convenient method of collecting organic material!

If you did not have the opportunity to stop by our booth, we wanted to point out some Cortec products and technologies that may interest you. Included is information on our key product lines related to the composting community:

- **Equipment Preservation & Storage**
- **Structural Preservation & Maintenance**
- **Rust Removal and Prevention**
- **Compostable Films & Bags**
- **Biobased Lubricants, Plastics & Preservatives**

We have provided equipment manufacturers, contractors, material processors and consultants with cost-effective, environmentally sound solutions for over 25 years. We look forward to working with you to help reduce disposal, maintenance, building and labor costs.

**CORTEC**
