PRODUCT RELEASE

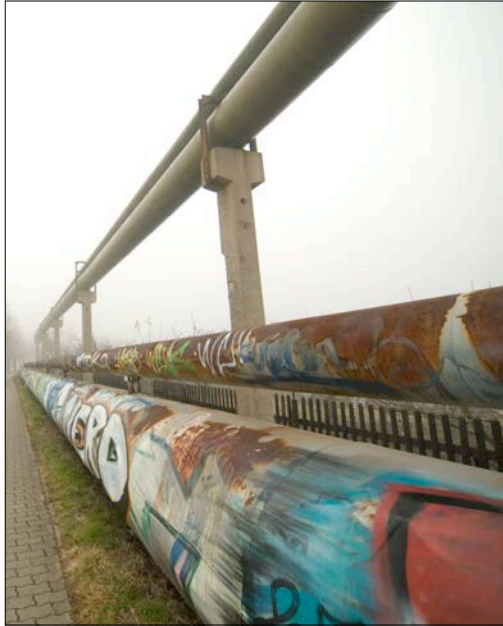

Cortec® Presents EcoClean® VpCI®-434G & VpCI®-434L Eco-Friendly Paint, Graffiti, and Gasket Removers!

Cortec® has added two safer and super-effective products to its ecofriendly and sustainable product lines. EcoClean® VpCI®-434G & VpCI®-434L are rapidly biodegradable, non-corrosive, low-toxicity, eco-friendly paint and graffiti strippers that were designed for a wide range of industrial paint removal applications, as well as being an efficient gasket remover. EcoClean® VpCI®-434G & L were formulated using environmentally safe benzyl alcohol to replace toxic methylene chloride type paint removers which are now banned.

EcoClean® VpCI®-434G is formulated to be an exceptionally smooth flowing gel that provides vertical cling to surfaces for the toughest stripping projects and EcoClean® VpCI®-434L is

a liquid solution. The stripper uses special wetting agents to penetrate deep into coatings, breaking them down and softening for easy removal of inks, acrylics, 2k & 1k urethanes, alkyds, lacquers, varnishes, and adhesives.

EcoClean® VpCI®-434G & L are effective on metal tanks, metal pipes, spray booths, structural supports, spray equipment, machine tools, workbenches, pipes, railcars, vehicles, airplanes, buildings, floors, stairways, pavements, road surfaces, etc. The stripping time varies, depending on the type and number of layers to be removed. The surface should be thoroughly washed with an aqueous cleaner (i.e. VpCI®-414, VpCI®-416, VpCI®-418) to prevent any contamination of applied coating.

FEATURES

- Low VOC
- Biodegradable
- HAPs Free
- Environmentally Friendly
- Low Odor
- Low Flammability
