PRESS RELEASE

Cortec's MCI® Wall Defense- Forever Goodbye to Graffiti Vandalism !

Even though they are acknowledged as a form street art, for many communities graffiti vandalism is a huge problem, causing significant visual, financial damage and time consuming efforts to remove tagging.

As a respond to this Cortec® launched the best prevention possible - MCI® Wall Defense, a clear, silicone elastomer based anti-graffiti coating that can be applied to exterior concrete, masonry or metal surfaces.

MCI® Wall Defense is designed to be used over various types of surfaces that are coated or uncoated. Any tagging can be immediately removed by rinsing off with a cold water pressure cleaning. It is as simple as that! This permanent coating does not need to be reapplied after graffiti removal like alternative sacrificial systems.

When it comes to protecting the nation's roadways, bridges, railcars, and other publicly or privately owned spaces from painted vandalism, Cortec's MCI® Wall Defense is the absolute best choice on the market, combining patented MCI (Migrating Corrosion Inhibitor) technology, superior effectiveness and simple and economical application.

By using MCI Wall Defense expensive, time consuming process of graffiti removal is avoided

MCI® Wall Defense may be applied by spray, brush, or roller. A film thickness of 300-375 microns is recommended. The coating dries to touch in 2 hours

Typical applications include: DOT, Schools and Universities, Port authorities, transit authorities, transportation – railcars, parking decks, urban commercial properties and many more.

MCI® Wall Defense can be recoated over itself, while other coatings, tagging, or graffiti will not stick. MCI® Wall Defense resistance starts to work 24 hours after coating. Substrates protected are concrete, masonry, metal and wood.

FEATURES

- Excellent exterior durability
- Breathable
- Repellent type
- VOC Compliant
- High UV Resistance
- Excellent gloss retention
- Elastomeric properties
- Hydrophobicity
