

NEWS ALERT

New Record for Cortec® Advanced Films!

March 17, 2008

Cortec® Advanced Film has broken its previous monthly extrusion record in January 2008 with a 15% increase from the former highest amount held in August 2007.

Advanced Film's strong growth during this exceptional year required new investments from Cortec®. Modifications made to the film equipment, the purchase of two new bag machines, and the implementation of employee incentives has increased output.

This record shows the involvement of Cortec® Corporation in its commitment to customers. We are sure that 2008 will allow Advanced Films to continue its development.

Cortec® Corporation is a pioneer of environmentally friendly, corrosion protection Vapor phase Corrosion Inhibitors (VpCI™) & Migratory Corrosion Inhibitors (MCI®) technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
