Eco Film for Pet Waste Pick Up

EcoCortec—a pioneer in sustainable packaging technology and manufacturing

EcoCortec—a pioneer in sustainable packaging technology and manufacturing—is pleased to announce the availability of Eco Film bags specifically sized and packaged for convenient and easy pet waste pick up and disposal. Proud pet owners that are concerned for the environment are now able to be responsible in their community by cleaning up after their pets, while not damaging the environment. Eco Film bags are produced locally in Croatia and are available throughout Europe. Eco Film bags meet the most stringent biodegradability standards worldwide including

100% BIODEGRADABLE

EN 13432 and ASTM D 6400 and are listed with Din Certco and BPI. University of Zagreb also complete safety testing per European Norms.

Simply purchase Eco Film bags for your pet and then dispose of the waste in an environment rich

with microorganism activity and the bags will completely biodegrade into carbon dioxide and water within weeks.

This is especially suitable for clean pickup and easy disposal in a garden or municipal collection bin. Eco Film bags by EcoCortec are the strongest compostable bags available anywhere in the world, they are completely shelf stable and are completely waterproof—preventing inconvenient and messy leaks and breakages
