PRESS RELEASE

Take a ‘Greener’ Approach to Cleaning This Year with Bionetix® Biologicals!

The world today is looking for “greener” solutions to almost everything—from energy sources to disposable cutlery. Fortunately for the cleaning industry, Bionetix® International’s line of biological cleaners offers exciting alternatives to harsh chemicals that damage the environment and are sometimes difficult to dispose. Bionetix®

biological cleaners are powered by specially targeted microorganisms and enzymes that biodegrade specific substances such as lipids, proteins, celluloses, and starches, helping to remove soils and stains from the contaminated surface and destroy odor-causing substances. The following three options are great examples of where and how these cleaning options work.

ECO-NU-CLEAN™ is a hard surface cleaning concentrate designed to quickly remove embedded soils and leave surfaces sparkling clean in just one step. This thick high-viscosity liquid has powerful descaling properties. ECO-NU-CLEAN™ contains biologicals and stimulants that work together to biodegrade fats, oils, and greases in contact with the cleaning fluid. ECO-NU-

CLEAN™ is easy to apply by spray bottle and can also be used in automatic scrubbers due to its low foam formula. It is pH buffered to reduce the risk of damaging a floor's protective coating and in most cases does not even have to be rinsed off (except for surfaces with direct food contact). ECO-NU-CLEAN™ leaves behind a summer fresh fragrance.

ECO-CLEAN-ALL™ is even more versatile in cleaning organic soils. In addition to biodegrading fats, oils, and greases, the biologicals of this all-purpose cleaning liquid are able to digest proteins, starches, and other solid organic wastes to maintain a clean, odor-free facility. Residual biological activity continues to work to ensure cleaning and odor removal

occur even after initial product application. ECO-CLEAN-ALL™ can be used to remove organic stains such as food, wine, vomit, and urine from a wide variety of surfaces including carpet, tile flooring, fabric, and upholstery. It can be used to spot clean or shampoo carpets, drapes, or laundry. It can even be poured nightly into kitchen and bathroom sinks to keep drainpipes clean and clear of residual wastes and foul odors.

For those who want to find a “greener” cleaner to use outdoors on cars, trucks, and vehicle fleets, ECO-WASH™ is a biological cleaner specifically designed for washing vehicle exteriors. It has been formulated to provide dual action with a one-step cleaning method. The special blend of non-ionic surfactants, emulsifiers, sequestrants, and chelating agents wash away tough road grime quickly and effectively by penetrating and removing dirt and contaminants. The pH balanced

formula will not damage car materials such as polished metals, glass, vinyl, rubber, and plastic trim pieces. Like most Bionetix® International products it contains biological cultures that digest organic waste and will continue to work in drains even after disposal. ECO-WASH™ dries spotless and film free, restoring luster to finishes. It has an attractive environmental profile as it is

biodegradable, contains no petroleum distillates, and can be discharged directly to the sewer system.*

Bionetix® biologicals take a fresh approach to traditional cleaning by harnessing the natural ability of microbes to digest contaminants. These formulations make it easy to quickly penetrate and clean away the ugly soils and stains from floors, walls, carpets, fabric, vehicles, and more while eliminating exposure to hazardous cleaners and corrosive acids. The next time you need

to make a big impact on dirty surfaces and a low impact on the environment, be sure to take advantage of Bionetix® biologicals for cleaning and odor control.

Bionetix® International is a Canadian-based company that produces biological products used in thousands of field applications worldwide. We promote a healthy environment by providing superior, environmentally friendly alternatives to current treatment methods. Our customers are able to clean and remediate contaminated systems or boost agricultural productivity in a cost-effective, natural, and non-intrusive way through the application of our biological products. Headquartered in Quebec, Canada; Bionetix International is a subsidiary of Cortec® Corporation. ISO 9001:2015 Certified.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001:2004, & ISO 17025 Certified.
