

Expert knowledge to protect what you deliver

**Physical Protection
Atmospheric Protection
Damage Prevention**

NEFAB

Expert knowledge to protect ...

CORNERPACK L/C
protects the edges
stabilizes the pallet
allows higher stacking

STABUKRAFT
antislip paper
bonding layers
moisture barrier

SHOCKWATCH®
& **TILTWATCH®**
active warning
warns immediately of
incorrect handling

CORNERPACK W
avoids handling damages

BAG FIX®
cold glue
pallet stabilization

HEATWATCH®
registration of temperature,
shock and moisture variations

...what you deliver

BATES CARGO PAK®
inflatable bags
keeps your load
in position

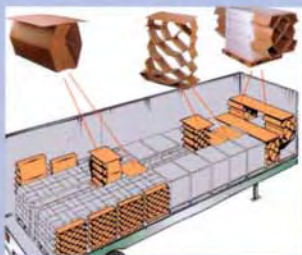

DEWPACK® AC/SI
moisture absorption
inside the packaging

CORTEC VpCI®
ecological
multi-metal
corrosion protection

LOAD SPACER
foldable gap filling
eliminates
shifting loads

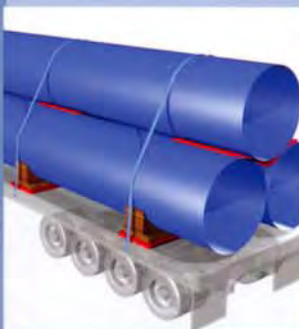

DEWPACK® FD/MD
humidity control
inside shipping units

CORTEC VpCI®
preservation during
transport & storage
direct readiness

STABUTEX
antislip mats or fleece
stabilizes the load

DEWSTOPPER®
absorbs droplets
of condensate
inside containers

CORTEC VpCI®
total corrosion control
for complex machinery

PHYSICAL PROTECTION

to avoid damages

- at pallet level such as
*cartons collapses
cartons/bags sliding
dents and scratches
shifting of layers
tilting of appliances*
- at load level such as
*shifting of load
crates toppling
breakage*

ATMOSPHERIC PROTECTION

to avoid deteriorations of products

- in the shipping unit
*caking, stale air, mould,
corrosion, coagulation,
melting*
- in the container
*sweating,
stop labels peeling,
mildew, rancid air,
freezing, collapsing*

DAMAGE PREVENTION

to avoid mishandling

- accidental impacts
*shocks
tilting
temperature
moisture*
- continuous quality influences
*vibrations, impacts,
humidity, temperature
and pressure variations*

Packinn Optimizes

Packinn defines the right balance between the protection cost and the total damage cost

LOW PROTECTION

insufficient protection increases the risk of damage

IDEAL PROTECTION

OVER PROTECTION

overprotection incurs high costs without obtaining better results

low protection cost

high

high

damage

low

Understanding the potential damage risks to your products during warehousing, handling and transport is a basic requirement to determine the protection needed.

Packinn is familiar with all the best methods to protect your products while in transit to the end user. This know-how gives Packinn the distinctive capability to provide the ideal means of protection for your various shipping requirements.

EXPERT KNOWLEDGE TO PROTECT WHAT YOU DELIVER

Packinn started its activities in 1987 with a broad knowledge of packaging and the mission of improving the protection of products in the logistics chain.

Today, we are proud to serve many companies in almost all business areas and to be a trusted partner of many leading companies who wish to protect their goods better in the product flow. Our logistics organisation serves their divisions all over Europe.

With the support of specialised suppliers of high-quality products, we successfully protect the goods in more than 170,000 container loads per year.

Drawing upon our know-how, we establish, each year, 270 new protection plans and make 50 in-depth studies. Packinn also holds many relevant patents.

Our operations are concentrated in the Benelux. We also provide technical support to distributors in Eastern Europe and South America.

We welcome each new request as a challenge to find the optimal solution.
