Re: New Canadian Food Inspection Agency (CFIA) Approval

Recently, Cortec's VpCI-101 Emitter Strip and VpCI-111 Emitter Cup, have received approval for use in federally registered food establishments throughout Canada. (See enclosed approval letters for specific details.)

Also enclosed is a new guide for the use of VpCI emitting systems in electrical/electronic enclosures. This guide outlines the method of application, visual test data, and frequently asked questions you may encounter in the field.

Hopefully these materials will be useful in your efforts to promote VpCI emitting systems in the Canadian market. If you should have any questions or comments, please feel free to contact us at any time.

Sincerely,
CORTEC CORPORATION

Mark Bosiacki
Sales Manager
