## Cortec® Corporation approves HITEK-nology Solutions for Marine and Military Markets.

April 5, 2007

Cortec® Corporation is pleased to announce the appointment of HITEK-nology Solutions as approved applicator for the marine and military markets. Cortec® has worked with numerous military applications for many years, such as mothballing, engine and parts preservation, and critical rust removal. Therefore, Cortec® is excited to be working with HITEK-nology Solutions, who are highly specialized applicators. This alliance will enable us to focus on an optimal approach: technology and professional service.

HITEK-nology Solutions was set up as a joint venture to provide the end customer, HM Royal Navy with a unique service to protect and preserve all aspects of the fleet whether operational or in long term lay-up. Using Cortec's unique Vapor phase Corrosion Inhibiting (VpCI™) technology and the multitude of methods of applying the materials, HSL (HITEK-nology Solutions Ltd) is available to provide timely, cost effective solutions to a wide range of applications, including void-spaces, steam ranges, corrosion control, and packaging of spares and repairs.
