

# Cortec® Salutes...

## The Proud People of Steel!!!

You are still able to hold your head up high demonstrating the Pride only you can feel. You are the survivors upon whom the future depends. You have faced the challenges and struggle onward knowing your contributions to steel will make the difference.

Like an unbreakable chain; strong enough to melt metal from ore; strong enough to mold it into ingots; strong enough to roll it into coils; your strength gives you confidence. It's hard work, but its honest, and steel people can be proud of it. Above all, it brings Pride to those who have met and conquered the many challenges.

Cortec® Corporation salutes your accomplishment with sincere thanks for allowing us to be part of it. For over 25 years, you challenged Cortec® to help solve corrosion problems cost effectively while protecting the environment where all can live in harmony. You gave us the determination to become great at what we do, and you helped make us the global leader in corrosion protection with over 200 products specifically designed to solve corrosion problems in all areas of steel production.

As Cortec® looks to the future exploring innovative technology, we are developing solutions to problems of corrosion with Total Corrosion Control™ every day.

Please visit us at the Iron & Steel Expo, booth #1750 so we can personally express our appreciation for your support and let us help make your job easier.
