Kids Activities

Barb Curtis was diagnosed with a rare type of breast cancer (HER2 Triple negative) on April 11th, 2008, at the tender age of 46. Due to her young age and rare cancer, the doctors needed to attack the cancer hard. During this difficult time of being out of work and insurance difficulties, the Curtis family has struggled with accrued expenses. Please join us in supporting our friend Barb!

You can follow her journey at: [www.curtisfamilybenefit.com](http://www.curtisfamilybenefit.com)  
All proceeds will go to Barb to help with expenses.

Donations can be made to:  
Barb Curtis Benefit  
c/o Cortec Corporation  
Teresa Babcock & Shannon Carrow  
4119 White Bear Parkway  
St. Paul, MN 55110

For donations, volunteering or other information, please contact:  
Shannon @ 651-212-7517 or Teresa @ 651-243-6445

### PRODUCT SPOTLIGHT:

#### Cortec® Corporation’s VpCI™-395 for Protection of Immersed Structural Metal and Equipment.

In the spotlight this week is VpCI™-395, a waterborne epoxy coating that offers users a safe, environmentally acceptable, low odor coating that allows use in immersed applications. When used with CorrVerter®, Cortec’s proprietary rust-converting primer containing Vapor phase Corrosion Inhibitors (VpCIs), this method is useful to existing structures that may be too costly or impossible to blast.
