CorShield® VpCl®-146 Paper
with 100% Recycled Content (USDA certified biobased 92%)

DESCRIPTION
CorShield® VpCl®-146 is the premium corrosion inhibiting paper in the industry. It relies on Cortec's patented Vapor phase Corrosion Inhibiting Technology, which has revolutionized the way metals are protected in an enclosed package.

Both sides of CorShield® VpCl®-146 paper offer effective protection to ferrous and non-ferrous metals, eliminating the need to stock a variety of papers for different metal types. All that is needed is to wrap items in the paper and fold the edges together, using adhesive tape as needed to hold paper in place. The VpCl® coating on the paper vaporizes, reaching all metal surfaces within the package to provide complete corrosion protection with a very thin, very effective VpCl® layer that does not alter product appearance or require removal before further finishing or use.

CorShield® VpCl®-146 paper is made from 100% recycled content paper and is fully recyclable/repulpable. It contains 92% USDA certified biobased content and is a qualified product under the mandatory federal purchasing initiative of the USDA BioPreferred® Program.*

PACKAGING & STORAGE
To ensure best product performance, store in original packaging, indoors, and out of direct sunlight at 40-100 °F (4-38 °C).

Shelf life: 2 years

*For more information about the BioPreferred® Program, please visit: https://www.biopreferred.gov.

FEATURES
• Contains no nitrites, phosphates, silicones, chromates, or other heavy metals
• Fully recyclable, repulpable
• Commercial equivalent to MIL PRF-3420
• Protective layer does not need to be removed prior to further surface finishing or coating application
• Tested by Zagreb, Croatia-Department of Health, for use on food articles
• Does not influence physical properties of most sensitive electrical components, including conductivity and resistance

BENEFITS
• One product for all ferrous and non-ferrous metals
• Combines corrosion protection and packaging into one step
• Effective protection on both sides of paper eliminates packaging guesswork
• Protects dry or oiled metals during storage, transit, and overseas shipment
• Effective against aggressive environments including humidity, SO_2, H_2S, and galvanic corrosion from dissimilar metals

METALS PROTECTED
• Carbon Steel
• Stainless Steel
• Galvanized Steel
• Cast Iron
• Aluminum Alloys
• Copper
• Brass (≤30% Zn)
• Solder
