Backgrou	Ind:Customer sent in fou would like these sam corrosion inhibiting and compared to Vp	ar samples of fluids used in their facility. They apples tested for biological growth. Also, the properties of their rust preventive will be evaluated CI-377.		
Sample F	Received: -Sample "A" RP-206 -Sample "B" Rinse V -Sample "C" 6-R Lin -Sample "D" Rawson	-Sample "A" RP-206 SP (Ultra Clean 206SP) -Sample "B" Rinse Water -Sample "C" 6-R Line -Sample "D" Rawsonville Wash		
Method:	Bacteria and Fungi C ASTM D-1748 Hum	Growth Monitoring idity (Modified)		
Material	S: Duo Bio Dipslides Customer's liquid sa VpCI-377 Deionized water 1010 cold rolled cart Laboratory grade me	mples (listed above) oon steel panels ethanol		
Procedui	 The following process 1) Fluids samples w a. Dipslides returned to condition b. After 96 I 2) Three carbon stees ASTM D-1748 h 3) After cleaning, p a. No treatm b. Dipped in c. Dipped in c. Dipped in water 4) After dipping, pa 5) Panels were them 6) After 96 hours, p humidity cabinet 7) Panels were visu 	dure was used: vere tested with Duo Bio Dipslides. were immersed in fluid for ~10 seconds, then to tube and allowed to sit at ambient s for 96 hours. hours, dipslides were visually inspected. el panels were cleaned with methanol prior to numidity testing. anels were treated as follows: hent (control) n Ultra Clean 206SP (neat) n VpCI-377, 4% concentration in deionized unels were hung for 2 hours to air dry. hung in ASTM D-1748 humidity cabinet. anels were removed from ASTM D-1748 ally inspected.		
Results:	The following result	s were found:		
	Panel Treatment	Time to Corrosion (Hours)		
	None (Control)	<8		
	Ultra Clean 206SP	<24

VpCI-377

No corrosion after 96 hours

Interpretations:	Duo Bio Dipslide testing showed slight to moderate bacterial	
	growth in the Ultra Clean 206SP sample and the rinse water	
	sample. No bacterial growth was seen in the other two samples.	

Humidity cabinet testing showed superior corrosion protection was given by VpCI-377 than the Ultra Clean product.
