September 12, 2006

Cortec® delegation attended the *2006 Export Packaging and Machinery Corrosion Prevention Technology Symposium* held on September 1st in Shenyang, China. At the symposium, Boris Miksic, president and CEO of Cortec® Corporation, and Michael Qiu, Chief Representative of Cortec® China, spoke on the topic: *Development Of Export Packaging And Cortec® Technology Worldwide*.

The 2006 Export Packaging Symposium was sponsored by China's Ministry of Commerce in response to the rapidly growing export industries in the Republic of China and increasing demand for improved packaging, that meets international shipping regulations and the tougher environmental requirements.

Cortec's VpCI™ corrosion control packaging products are well accepted and widely used by an increasing number of manufacturers and export companies around the globe. China, as a fast growing market, presents excellent opportunities for Cortec® to expand and grow its market share in East Asia.
