

NEWS ALERT

Cortec® Builds MCI® Relationships at 2017 ICRI Spring Convention!

Concrete repair ideas and relationship building went hand in hand at the 2017 ICRI (International Concrete Repair Institute) Spring Convention, March 15th-17th in Montreal, Canada. Ashraf Hasania, MCI® Technical Sales & Market Manager, represented Cortec® at its booth, answering questions and seeking to build rapport with the many market players at the event. Among these were engineers interested in specifying or learning more about Migrating Corrosion Inhibitors (MCI®). A common topic of discussion was the use of MCI® to extend service life of existing parking garages.

ICRI also hosted committee meetings to give industry professionals the opportunity to discuss challenges and contribute helpful ideas to the concrete repair industry. Hasania attended some of these meetings, including the corrosion technical committee, and was able to take in some technical presentations on repair technologies, as well.

Cortec® looks forward to developing further relationships with those who attended the event. As always, Cortec® is eager to help more engineers and contractors extend concrete service life with MCI®—whether in parking garage repairs, new construction, or existing structure maintenance!

MIGRATING CORROSION INHIBITORS
FROM GREY TO GREEN

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
