Cortec® Makes Dynamic Impression at Middle East's Largest Oil & Gas Conference

Cortec® Middle East (CME) once again gave a dynamic presentation of Cortec® corrosion solutions at this year's ADIPEC, the largest oil and gas conference in the Middle East. The important convention took place November 11th-14th in Abu Dhabi, UAE, attracting a broad range of engineers, contractors, consultants, government representatives, and technical decision makers to CME's impressive booth near the entrance to Hall 11.

As before, CME's VpCI® diffusion demo was of key interest, as it visualized the ability of Cortec® Vapor phase Corrosion Inhibitors to protect metals in hard-to-reach areas by traveling through void spaces via vapor diffusion. In general, attendees seemed to immediately think of the Cortec® brand in conjunction with VCI technology and recognize its innovation and advantages over conventional corrosion solutions. Another eye-catching demo was CME's new mini 3D aboveground storage tank (AST) model demonstrating CorroLogic® solutions for online, offline, and new ASTs.

During peak traffic, good attendance kept as many as half a dozen CME representatives engaged with booth visitors at one time. There were many meaningful conversations during the event, and CME looks forward to following up with effective and practical solutions for a variety of important projects throughout the region that are in the pre-commissioning phase or already under construction.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 and ISO 14001 Certified, and ISO 17025 Accredited.
